 25X1

The following observations were made at Erfurt-Bindersleben airfield between 3 and 12 March 1954:

1. 3 March. Around 4:30 p.m., a MiG-15 approached the field coming from the direction of Bad Berka. The sky was cloudless.

4 to 7 March. No air activity was observed at the field from the town of Erfurt.

8 March. Shortly after noon, an individual swept-back jet aircraft took off, circled once over the field and then landed there. A few minutes later, a Yak-11 was observed aloft over Erfurt. At 1 p.m., 2 swept-back jet aircraft crossed over the field. At the same time, 7 aircraft, probably Yak-11s, were observed aloft flying once in one single flight and later in elements of twos. The aircraft had approached from the east and landed at the field up to 1:10 p.m. At 1:27 p.m., two MiG-15 or U-MiG-15s took off, but their landings were not observed.

9 March. No air activity was observed.

10 March. Between 10:40 a.m. and 3:30 p.m., there was air activity by Yak-11s. Source made his observations from Erfurt and believed that local flights were being made.

11 March. Yak-11s were again observed aloft.

12 March. Between 10:30 a.m. and 1:30 p.m., there was air activity by Yak-11s. The degree of cloudiness changed.

While, on 6 March, some MiG-15 or U-MiG-15s were observed parked at the field, since 8 March, an additional and undetermined number of Yak-11s have been stationed there.

2. The AA gun emplacement at the southern edge of the field was still occupied
25X1 Vehicular traffic at the field involved trucks

25X1 Comment. Erfurt/Bindersleben airfield is still occupied by an alert flight which is probably detached from the fighter regiment in Merseburg. The Yak-11s which have been observed since 8 March here are probably also assigned to the same regiment and apparently detached to Erfurt so as to increase training facilities at Merseburg airfield.
